DETAILED ACTION

Allowable Subject Matter

1. Claims 3-21 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance: Mizuno et al. disclose a method for editing/creating synthetic speech in which the text message input is separated into prosodic feature control commands and sentence structure part. The prosodic feature control commands are then analyzed to extract the control sequence of the commands. At the same time, the sentence structure part is broken down into word string having a meaning associating with a particular set of prosodic parameters. Based on the set of prosodic features, speech is synthesized and modified (*the operation of figure 3*). However, Mizuno et al. fail to specifically disclose the step of recording the background noise contained in the environment in which the speech is reproduced, wherein the background noise is used to modify the synthesized speech to increase speech intelligibility. Furthermore, it would have not been obvious to one of ordinary skill in the art at the time of invention to modify Mizuno et al. to include the limitations above to realize the claimed invention. Therefore, claims 3-21 are allowed over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
